

OP 20a - LBK
Renaturation of LBK in the sense of principles in the Landscape Ecological Plan

OP 02d - NRBK Váh
Construction of a bridge over the old Váh bed - foundation, bridge supports, etc. as a separate technology of construction must be designed with maximum consideration of the contact with the biocorridor; new bank reinforcement of the Váh must enable the rapid recovery of the riparian vegetation; on the bridge, it is necessary to make measures against collisions of migrating birds with the bridge object.

OP 20a - LBK
Renaturation of LBK in the sense of principles in the Landscape Ecological Plan

OP 12 - RBK Maninský potok
In the built-up area, realize a partial revitalization of the water flow with planting of riparian vegetation with its subsequent recreation-recreational use.

OP 14a - RBK Maninský potok
Part of the biocorridor are also ponds near Považská Teplá - measures in the sense of OP 03c - NRBK Váh

Územný plán Mesta Považská Bystrica z roku 2008
